## DATA ANALYST

Hello! My name is Adytia. I am an aspiring data analyst. I am currently working as a leader for marketing and visual graphics. I am a strong communicator with respectable experience in tender/procurement & data with about 30+ tender winnings and developed tender database system and successfully increase productivity by 200%. I also have experience in data visualization and visualized many presentation deck and project reports. Right now, I want to explore new possibilities in Data Analytics because as an engineer, I have affinity to work with number, and Data Analytics really excites me. Data Analytics successfully combines aspects of work that I enjoy such as computation, communication, and visualization. Recently I have finished my Full Stack Data Analytics Program at RevoU and successfully gained new skills as well as networks.
